

IQ CAMERA

Intelligent Risk Management

Get the visibility that you need to improve safety and protect your drivers from false claims. The fully connected IQ Camera uses video AI to review every minute of drive time so you can understand behaviour like never before and easily access footage to validate insurance claims.

The IQ Camera is a powerful enhancement to our fleet management software, where it can be used alongside the TN360 Driver Scorecard to give

Tailgating Warning

you everything that you need to reward positive behaviour and identify areas to improve.

The IQ Camera allows you to manage your fleet in real-time and takes coaching into the cab, with driver assistance and status monitoring. Your team will be able to identify high risk actions with audible alerts for events including tailgating, lane departure and forward collisions.

Simplicity

Access all video footage through the TN360 platform

AI Powered

AI reviews every minute of driving time.

Driver Status Monitoring

Combat distracted driving

Advanced Driver Assistance

Ensure drivers are correcting high risk actions

KEY FEATURES

Dual Camera

Forward and inward facing AI camera, enabling driver assistance and status monitoring.

Driver Status Monitoring

Take a proactive step to keep your drivers safe with status monitoring that detects distracted driving.

Advanced Driver Assistance

Reduce risk across your drivers with audible alerts for high risk actions including lane departure, tailgating and forward collisions.

Fully Connected

The IQ Camera is fully connected into TN360, where you can view event footage and make requests for additional recordings.

Driver Initiated Events

For emergency situations drivers can press an emergency record button, ensuring the footage is retained and made available in TN360.
