Teletrac Navman

IN-VEHICLE DRIVER TOOL

Easy to use, managed in-cab device for transport

For truck drivers, your cab is your office. Teletrac Navman's in-cab tool is a 7" rugged tablet that helps maintain compliance, whether fatigue, speed, mass or maintenance, and provides an execution platform for drivers to complete tasks.

Our transport in-cab device entirely digitises paper-based processes, to eliminate tedious manual tasks, helping to improve efficiency and productivity. The solution delivers intelligent safety and compliance tools to professional drivers in real-time.

Used by tens of thousands of drivers across Australia and New Zealand, the iFace is a proven and dependable driver tool that improves productivity, safety, compliance and communication.

• Electronic Work Diary (EWD)
• Pre-trip inspection checklists
• Customisable forms
• Mass management
• Speed management
• Electronic in-cab documents
• Real-time Route Guidance
• Job management
• Instant messaging & voice calling
• Driver identification

Benefits of a managed in-cab environment

Improve Safety

• Intelligent fatigue management and driver work/rest hours via EWDs.
• Proactive vehicle maintenance ensuring vehicles are safe and efficient.
• Real-time driver feedback to optimise on-road performance and reduce speeding violations.

Increase Productivity and Efficiency

• Automates previously manual tasks, by giving drivers a digital platform.
• Complete freight management workflow that optimises the driver's tasks for the day.
• All-in-one device that stores documents, provides a means for driver identification, voice and text communication and recording regulatory information.

Reduce Compliance Risk

• Meet Health and Safety at Work regulations and demonstrate due diligence in managing Chain of Responsibility laws.
• The one driver tool to help manage fatigue, mass, maintenance and speed with ease.

Transform Your Business

• A modern, efficient and connected business that utilises technology and its data to reduce costs, improve on safety andincrease performance.
• Achieve new levels of service excellence to improve your customer satisfaction.

"Implementing the Teletrac Navman system has been the best thing we've ever done. Teletrac Navman has customised everything to what we need and want. It's not a case of buying off the shelf and being stuck with the same product. It's personalised to what we need." **- Leigh Smart,** Formula Chemicals

Benefits of a Managed In-cab Environment

Teletrac
Navman

RUGGED, PORTABLE DEVICE

• IP54 water & dust proof, up to 1.8m & 20g shock resistant
• Anti-glare 7" multi-touch screen
• Built-in camera
• 10hrs battery life
• Dual GPS satellite system

Electronic Documents	Remote Control	Control Over Access
Speed & Driver Behaviour	Integration	No Compatibility Issues
Driver ID & Communication	Nationwide Warranty	Support
User Information	Tracking & Location	Increased Focus
Administration & Control	Software	Driver Buy-in

What does a device managed environment look like?

With advancements and innovation in technology, comes complexity. Teletrac Navman's solution offers a powerful yet simplified solution for the transport and logistics industry. The solution provides an end-to-end managed environment that takes away the need for businesses to manage, or even understand, the complexities of mobility. Software updates, compatibility issues, remote fault finding, and support are all core services that are included as standard within the bundled price.

All this gives owners and managers the peace of mind of knowing the solution is there to meet business requirements all while building a culture of safety. While the operation runs smoothly, drivers can focus on the task at hand and management can focus on more constructive initiatives
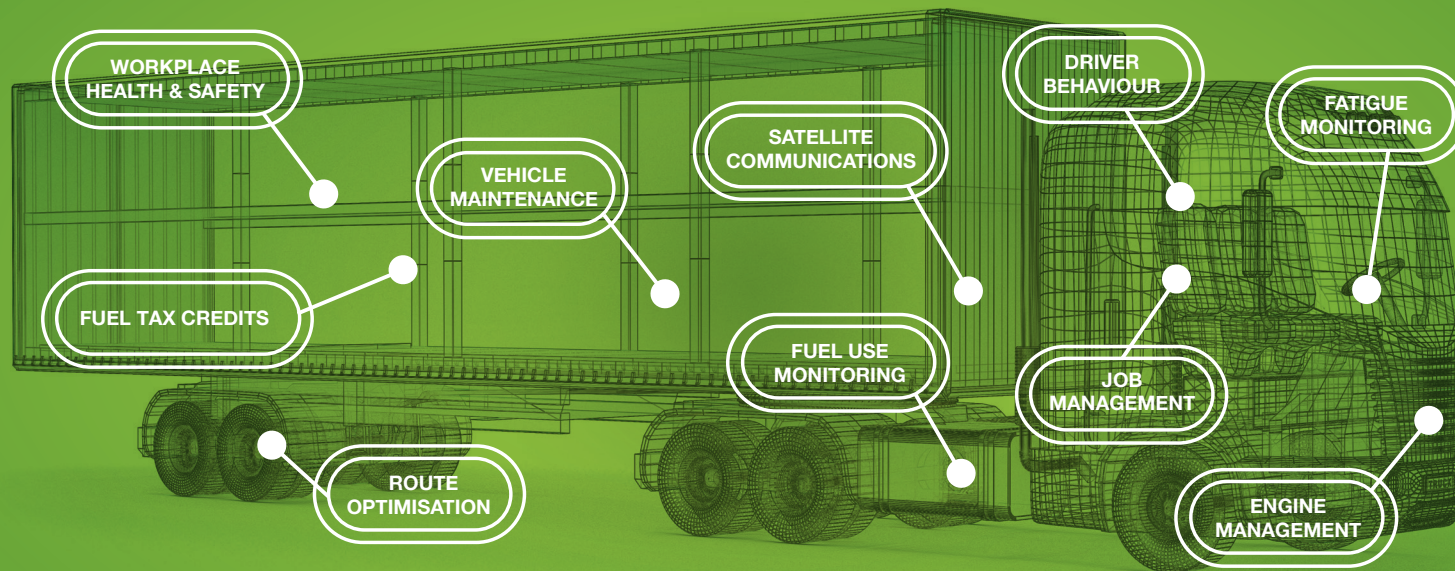

You need to be able to ensure drivers are able to:

(a) Carry out their tasks at hand compliantly and are not distracted by technology that is not locked down

(b) Access latest versions of all business applications and services on the device

(c) Seek assistance via IT or customer service, for troubleshooting and support

Get Your Environment Connected

Teletrac
Navman

This solution is part of the Teletrac Navman suite of integrated fleet management and telematics solutions we call "The Connected Truck". This includes electronic fuel tax credit (FTC) management, in-cab driver communication, route-to with turn-by-turn navigation, job management, driver behaviour, workplace health & safety and compliance, engine and maintenance data and customised solutions to create a 21st century connected business. You can choose the solutions you want to meet your needs today, with the flexibility to add solutions for changing needs in the future.
